

HIGHEST 3D SOUND QUALITY

THE UNIQUE LISTENING EXPERIENCE

Natural sound converter Eternita for sound therapy / sound for events / private use

ETERNITA is designed to meet the highest musical demands:

Powerful and a professional all-rounder (2 x 180 WRMS) It is suitable as a PA system for the precise and undistorted live transmission of speech, vocals and instrumentation For concerts, seminars, conferences and trade fairs as well as for professional mixing in the recording studio All this in an impressive quality that is suitable for defining a new age of music!

In the interior - especially in rooms with "difficult" acoustics, ETERNITA projects such a detailed and true-to-original sound image into the room that the listener is acoustically barely able to differentiate between LIVE music and sound carriers Outside you have to experience ETERNITA yourself in order to be able to assess what a completely different sound experience comes about when music spreads undirected and with almost no stressful sound pressure into the open space.

Even at a distance of 100 meters and beyond, musical subtleties and details remain differentiated and perceptible.

The natural sound characteristics of the 3D music are created by the NATURAL SOUND CONVERTER.

The sound flows like a spring fountain with a fountain in all directions without a deficit of the audible time differences, reflections or disturbing reverberation phenomena. The acoustic result is unadulterated enjoyment even at distances that you previously thought impossible!

Even at higher volumes, the **ETERNITA** surprisingly remains free of distortion and the sound is retained

The proportions of the individual housing parts as well as the selected room volume are based on precisely determined harmonic numerical ratios (including the golden ratio, Euler's number), which are reflected both in the aesthetic effect as well as in the acoustic harmony and the unique **3D SOUND EXPERIENCE** made possible

Natural materials for a natural sound!

Innovations and special features of **ETERNITA**: Two freely selectable built-in crossover systems 3-stage bass reflex tube system with "Vario membrane" Synchronization of the crossovers by **quartz crystals**

For indoor or outdoor areas and the dynamic adaptation of the sound to the spatial conditions automatically adjusts the damping of the woofer to the given volume and ensures a clean bass at any volume

For a significantly improved phase linearity, a clear location of the entire musical event and an extremely precise impulse behavior

Gold production in certain places for highest vibration information, for purity, clarity and health

Technical specifications:

- 2 x 3-way speaker columns - 2 x 180 watts RMS at 4 ohms Equipment: - 2 x 6 m connection cable
- 2 x high-end plugs Material: - 7-layer glued real wood with face veneer Struts / plates made of V2A stainless steel
Speaker columns: - Height: 120.0 cm - Ø body: 30.0 cm - Ø base: 32.0 cm
Weight: 25.3 kg (per column)

RENTAL per DAY CHF 350.-
(including delivery within 100 KM from Bern / CHF 1.- per additional KM)

SUPPORT SOUND TECHNICIAN per DAY CHF 300.- (including delivery within 100 KM from Bern / CHF 1.- per additional KM)
